Dear Selection Committee,

I am writing to express my strong support for the proposed high-safety and high-comfort bike path that will connect the communities of Sanpete County. This initiative aligns closely with the Central Utah Health Department's mission of protecting and promoting health and well-being for all residents within our jurisdiction.

As the Director of Community Health at Central Utah Health Department, I understand the significant health benefits that come from creating environments that support active lifestyles and make safe, accessible transportation a priority. By facilitating convenient, safe, and active transportation options, this bike path will foster a healthier, more connected community. It provides families with access to everyday destinations in ways that promote physical activity and reduce reliance on vehicular travel, which aligns with our department's commitment to sustainable health practices.

We are excited about the opportunities this project will create for Sanpete County and are eager to contribute to its planning and implementation. Central Utah Health Department is dedicated to working collaboratively with local leaders and stakeholders to see this vision become a reality. Together, we can ensure that this project not only supports the health of our community today but also leaves a lasting, positive impact on future generations.

Thank you for considering our enthusiastic support for this project. I look forward to working with you to help build a healthier, safer, and more vibrant Sanpete County.

Sincerely,

*Trevor Carter*
