

To Whom It May Concern,

As the Mayor of Spring City, I wholeheartedly support the development of a high safety and high comfort bike path along US-89, connecting Fairview to Gunnison. This initiative will significantly enhance our community's quality of life, has the potential to guide sustainable growth, and promises to boost our local economy.

The bike path will promote improved well-being by encouraging a healthier lifestyle, reducing traffic congestion, and providing an eco-friendly transportation alternative. The path network aligns with our community's vision for responsible growth, fostering a vibrant, connected environment that attracts new residents and businesses.

Similar projects elsewhere have demonstrated the economic benefits of such initiatives, attracting tourism, supporting local businesses, and creating jobs. Investing in this bike path is an investment in the long-term prosperity and resilience of our community. I urge your support for this transformative project, confident it will positively impact the future of Spring City and Sanpete County.

Sincerely,

A handwritten signature in black ink, appearing to read "Chris Anderson". The signature is fluid and cursive, with a large initial "C" and "A".
